

Dear Partner,

We are glad to inform you that HUPX is now entering the test phase of the registration process at ACER in order to become an RRM (Registered Reporting Mechanism) to provide transaction reporting services for energy market participants and organized market places, helping them to fulfil reporting obligations under the REMIT Implementing Acts.

Since the beginning of REMIT reporting implementation phase, HUPX has actively participated in the test phase of ACER's reporting and registration processes therefore has the experience dealing with the structure and operation of the ACER data collection system (ARIS). Our mechanism will be able to report standard and non-standard contracts concluded in organized market places and OTC as well as the fulfilment of backloading obligations.

The RRM reporting services **for our Members** will be included in the HUPX annual membership fee. For **non HUPX members** the annual fee will be **1000 EUR**. Those Members who wish to fulfil their reporting obligations via a third party will also have access to their data in raw XML format in the relevant HUPX SFTP folder.

Trades concluded on HUPX platforms can be automatically uploaded to the ACER ARIS system by HUPX and after uploading the market participant will receive the receipt files generated by ACER in a dedicated HUPX SFTP folder. All other data, i.e. standard contracts traded outside of HUPX and all non-standard data can be uploaded by market participants on a website provided by HUPX from where proper data files can be sent to the ACER ARIS system. The website will provide information about the status of the upload process.

Please note, that HUPX will require the ACER-code from the Market Participant and for more details we shortly send you the data reporting agreement.

HUPX intends to inform you regularly about its registration process and provide you with all the relevant information regarding reporting obligations.

We hope that all our members will examine the option to fulfil their reporting obligations through our company.

Meanwhile, if you have any questions please do not hesitate to contact us at: Remit@hupx.hu

Kind regards,
