

HUPX GO Market

DTS Digital Trading System overview for traders with the introduction of multiple seller model

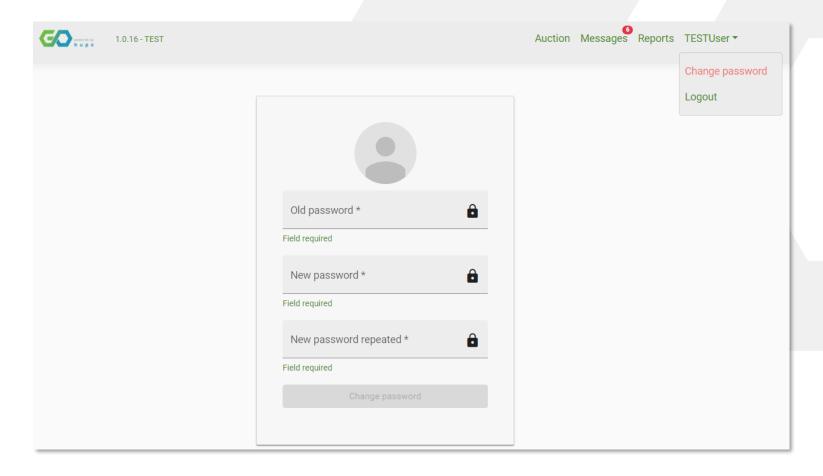

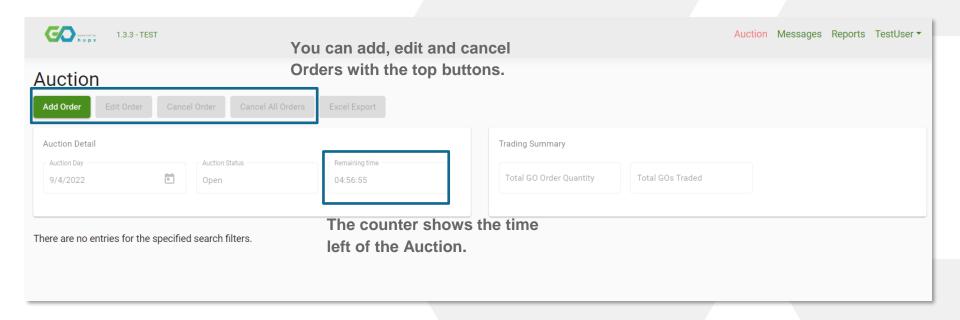

Change your password anytime

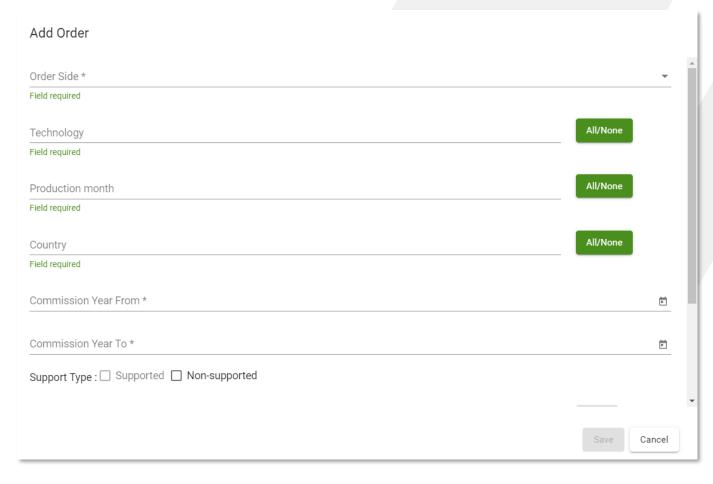

This is the main screen of the Trading System.

As a "black box" Auction, Members can see only their own Orders.

Data of total FiT production volumes is published on the website of HUPX.

Order Management – Inserting Orders

Select side then set the 5 attributes:

- 1. Technology
- 2. Production month
- 3. Country
- 4. Commission Year
- 5. Support type

Order Management – Attribute setting options #1

Add Order

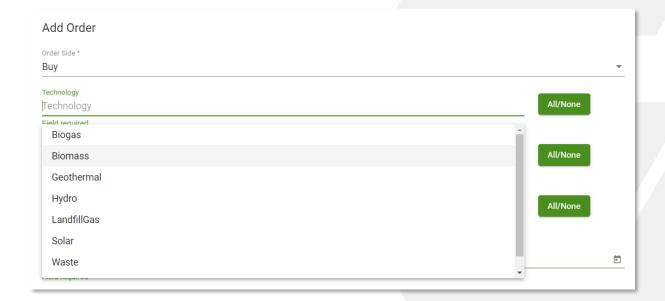

Order Side *

Dropdown list & click

All/None

All/None

Type & select

Order Management – Attribute setting options #2

All/None buttons

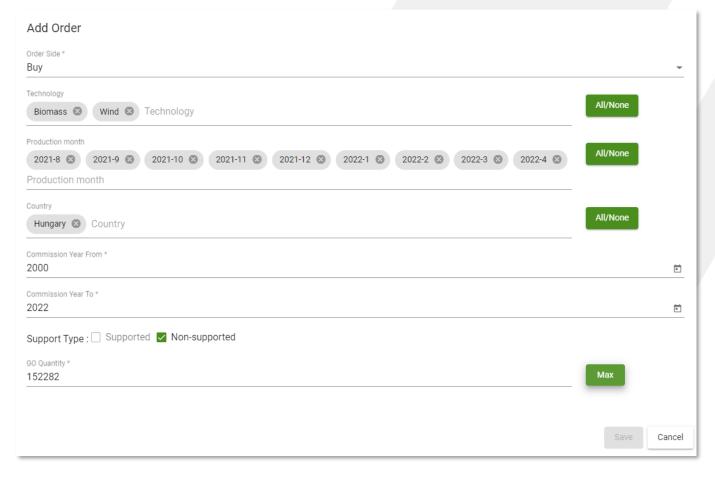

Based on the attributes of the GOs placed as Collaterals

Calendar option for commission year

Select commission year intervals as from-to

Order Management – Volume queries #1

Check the available volume with the Max button!

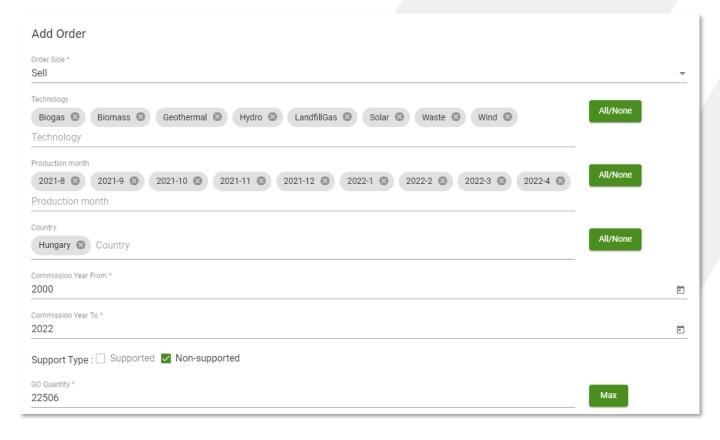

The Max button will set the GO quantity based on the GOs placed as Collateral.

On the Buy side the Max button will show the total GOs placed as Collateral based on the selected attributes.

As trading limit on the buy side for Hungarian companies 27% VAT is applicable, while 0% VAT is applicable for other EU companies.

Order Management – Volume queries #2

On the Sell side the Max button will show the total GOs your company placed as Collateral based on the selected attributes.

Trading limit is calculated before and after each action. On the sell side the trading limit is calculated for every possible attributes.

Order Management – Order insert

GO Quantity * 50000	Max
Price [EUR/GO] * 3.51	
Action : Only preference Fill the remaining	
	Save

You can insert either the Max or other volume.

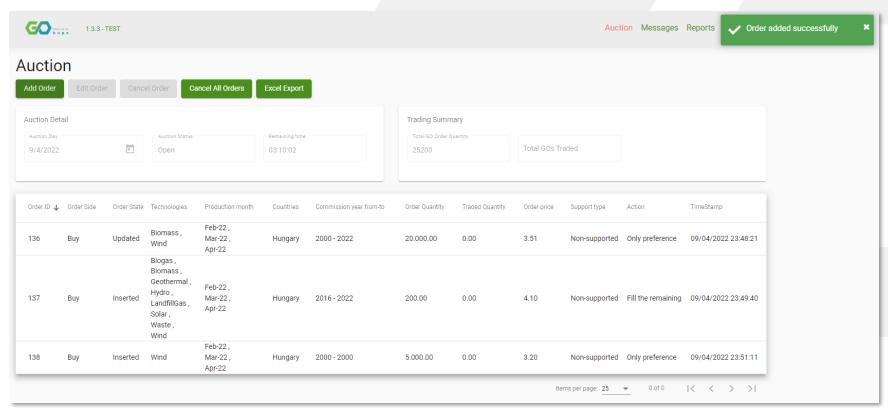

You can set the price up to 2 decimals.

For buy orders you can specify two different actions:

- 'Only preference' means that the inserted Order is submitted only for the given attributes
- 'Fill the remaining' means that if there isn't enough volume for the given attributes then you may receive other GOs (pricing algorithms still apply)

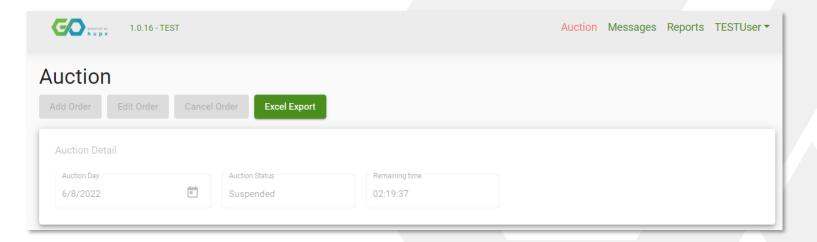

Enter key (shortcut): Insert Order

You may insert multiple Orders

An Auction may be suspended during exceptional circumstances.

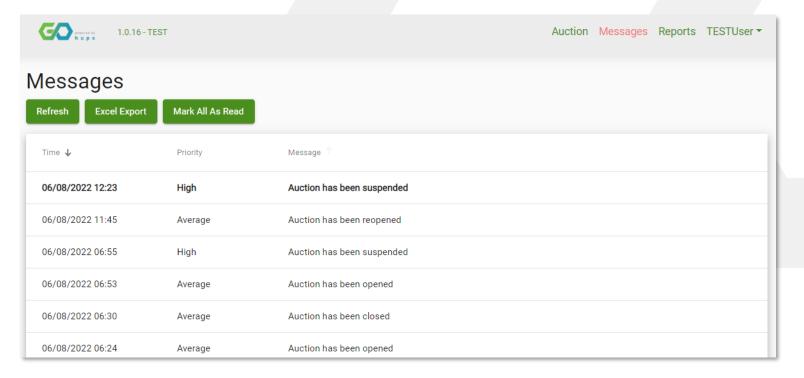

HUPX GO market operators always notify you directly, if such problem occurs.

You cannot modify or add Orders, when an Auction is suspended.

Messages and notifications

Auction results GO MARKET

Order ID 👃	Order Side	Order State	User name	Technologies	Production month	Countries	Commission year from-to	Order Quantity	Traded Quantity	Order price	Support type	Action	TimeStamp
29	Sell	Cancelled	USER2	Wind	Feb-22	Croatia , Hungary	2015 - 2015	41 288.00	0.00	2.00	Non-supported	Only preference	09/01/2022 13:25:56
33	Buy	Dealt	USER6	Wind	Feb-22	Hungary	2010 - 2010	12 057.00	12 057.00	0.80	Non-supported	Only preference	09/01/2022 13:38:33

After the gate closure time, the Auction algorithm calculates the result.

Green indicates Orders, which has been completely accepted as a Trade.

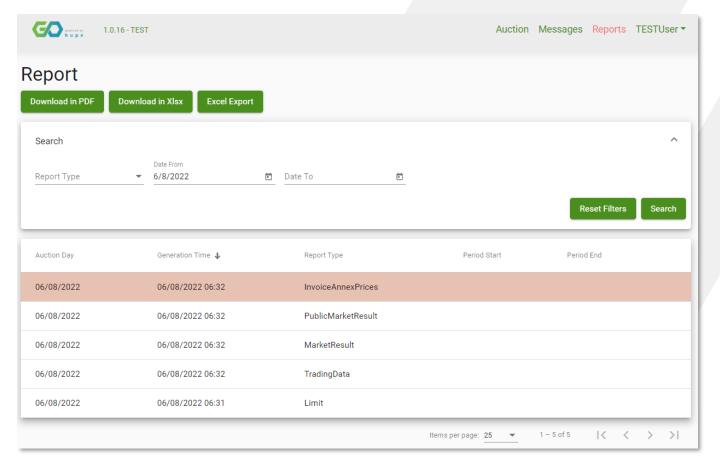

Orange indicates Orders, which has been partially accepted as a Trade.

Red indicates Orders, which has not been accepted.

The financial transactions and GO transfer will be started in 24 hours after the Auction.
